OBJECTIVE

A dedicated engineering student who enjoys solving problems and learning new technologies. Looking for opportunities to work on meaningful projects and grow professionally.

EDUCATION

- **KLE Technological University, Belagavi** 2023 – 2026
Bachelor of Engineering (B.E) Karnataka, India
 - **CGPA:** 8.24
- **Maratha Mandal Polytechnic, Belagavi** 2020 – 2023
Diploma in Computer Science Karnataka, India
 - **CGPA:** 8.38
- **Benaka Vidya Mandir, Hubballi** June 2020
Secondary Education Karnataka, India
 - **Percentage:** 81.12%

SKILLS

- **Programming Languages:** C++
- **Web Technologies:** HTML, CSS, JavaScript
- **Database Systems:** Oracle SQL
- **DevOps & Tools:** Git, GitHub, AWS, VS Code
- **Core Concepts:** Data Structures, OOPs, DBMS, OS

PROJECTS

- **GPU Monitoring & User Management Dashboard** Jun 2025
Python, Flask, Pandas, Chart.js, HTML, CSS, JavaScript
 - Designed and implemented a real-time GPU/CPU monitoring system for Linux servers using **psutil**, streaming live metrics to a web dashboard.
 - Built a secure user management , session handling, and inactivity tracking.
 - Automated data processing by parsing GPU logs with **Pandas** and generating interactive charts and downloadable reports for performance analysis.
- **DevOps Automation – CI/CD Pipeline for React Chat Application** May 2025
Docker, Jenkins, AWS EC2, GitHub Webhooks
 - Implemented an end-to-end **CI/CD pipeline** using Jenkins and GitHub Webhooks to automate build, test, and deployment workflows.
 - Containerized a React-based chat application using **Docker** and deployed it on **AWS EC2**, ensuring consistent and scalable deployments.
 - Configured automated build status notifications to quickly identify failures and improve deployment reliability.
- **IoT-based Gas Detection and Automated Booking System** Apr 2025
NodeMCU ESP8266, MQ2 Sensor, HX711, Python, ThingSpeak, Blynk
 - Developed an IoT-enabled gas monitoring system that detects leakage and low gas levels, triggering email alerts.
 - Applied **machine learning models** to predict cylinder depletion and automatically initiate gas booking via APIs.
 - Integrated **ThingSpeak** and **Blynk** platforms for live data visualization, analytics, and remote monitoring.

COMPETITIONS & HACKATHONS

- **Anaveshana – National Level Prototype Competition, BMS Institute of Technology** Mar 2025

CERTIFICATIONS

- **DevOps Foundation Course** Dec 2024
